Education

University of Washington, Seattle, WA
Ph.D. Candidate in Child Clinical Psychology (expected 8/2021) — 2014-present
M.S. Clinical Psychology — 2017

Amherst College, Amherst, MA — 2007
B.A. Psychology

Awards and Honors

Fellowship, Harvard University Department of Psychology — 2019-2020

Graduate Student Travel Award, Flux society — 8/2019

Graduate Student Travel Award, Society for Research in in Child Development — 1/2019

Robert C. Bolles Graduate Fellowship, UW Department of Psychology — 10/2018

Arts & Sciences Natural Science Fellowship, UW College of Arts and Sciences — 3/2014

3. Lambert, H.K., Gold, A.L., **Peverill, M.**, Sheridan, M.A., & McLaughlin, K.A. (2015, November). *Child maltreatment, neural structure, and psychopathology in adolescence.* Poster presented at the International Society for Traumatic Stress Studies Annual Meeting, New Orleans, LA.

2. Gold, A.L., Sheridan, M.A., **Peverill, M.**, Busso, D.S., Lambert, H.K., Alves, S., Pine, D.S., & McLaughlin, K.A. (2015, October). *Childhood maltreatment and reduced cortical thickness in brain regions involved in emotional processing.* Poster presented at the Developmental Affective Neuroscience Symposium, Pittsburgh, PA.

1. **Peverill, M.**, Finn, A., McLaughlin, K., Sheridan, M. (2014) *Prefrontal Cortex Recruitment During Working Memory Filtering in Adolescents and Adults.* Poster presented at the annual meeting of the Cognitive Neuroscience Society, Boston, MA, April, 2014.

Research Experience

Research interests: Childhood Adversity, Emotion Regulation, Socioeconomic Status, Psychopathology Risk, MRI Methods.

School Social Environment Study, Seattle, WA 2017-present
Investigator (Dissertation Project)
Committee: Katie A. McLaughlin, Ph.D. (advisor), Shannon Dorsey, Ph.D., Liliana Lengua, Ph.D., James Mazza, Ph.D.
My dissertation explored mechanisms linking socioeconomic status with psychopathology in adolescence. Income based measures of socioeconomic status show relatively weak relations to psychopathology in adolescence, but subjective measures show a more robust association. To explore the implications of this finding, I collected information on psychopathology and a variety of measures of socioeconomic status in a sample of adolescents, including subjective status measures and an ideographic measure of symbolic capital (ownership of objects symbolic of high social status). By examining inter-relationships of these measures with psychopathology, I hope to discover which metrics of socioeconomic status are most associated with adolescents' mental health, and whether adolescents' display of status in their peer environment is related to their subjective social status. I additionally conducted a number of experiments exploring potential cognitive mediators of SES-conferred psychopathology risk. While running the study, I:

- Recruited and supervised a team of 3-5 concurrent research assistants conducting study setup, recruitment, and data collection.
- Ran a weekly lab meeting for research assistants presenting current research.
- Designed a battery of qualitative semi-structured interviews, written questionnaires, and computer-based cognitive tasks for use in the experiment.
- Wrote and managed IRB protocol submission.
- Supervised recruitment of a sample of 16 high schoolers to conduct qualitative interviews; 50 high schoolers to complete a brief questionnaire, and 80 high schoolers and their parents to complete a final study session.

- Conducted safety and risk assessments for participants who endorsed suicidality or child abuse under supervision of a licensed clinician.

Stress and Development Laboratory, Seattle, WA 2014-present
Graduate Research Assistant
Supervisor: Katie A. McLaughlin, Ph.D.
As a graduate student in the Stress and Development Lab, I have played a key role in our work, from data collection through analysis and manuscript preparation. Our investigations examine mechanisms through which stress and adversity impact children's development, with a particular focus on physiological and neural processes. In particular, I was involved in two R01 funded studies investigating the theory that separate aspects or dimensions of adversity may affect psychopathology through distinct neurodevelopmental pathways. As part of my work with the lab I have:

- Developed MRI pre-processing pipelines and performed code review and quality assurance for fMRI pre-processing.
- Implemented and documented techniques for functional connectivity analysis of fMRI data.
- Collected data for our studies including clinical interviewing and measures (see clinical experience).
- Mentored research staff and students through early career research projects.
- Trained research staff in study procedures.
- Trained lab members in the use of Freesurfer editing tools for structural MRI quality control and supervised the lab's structural MRI quality control process.
- Prepared datasets to be shared with other laboratories and the Psychiatric Genomics Consortium for PTSD.
- Wrote study coding anchors for UCLA Life Stress Interview independent coding groups. Managed and supervised coding of participant data.
- Designed and coded fMRI tasks in e-prime and PsychoPy.

Project RISE, Seattle, WA 2016
Graduate Research Assistant
Supervisor: Bill George, Ph.D.
Project RISE was an investigation of mechanisms leading to sexual offending in adult men. As a research assistant, I conducted 10 semi-structured interviews about sex and relationships with men at high risk for offending as part of a qualitative pilot used to inform later research design.

Sheridan Laboratory, Children's Hospital Boston, Boston, MA 2013-2014
Research Coordinator
Supervisor: Margaret A. Sheridan, Ph.D.
As part of a study exploring neural correlates of ADHD desistance, I:

- Coordinated fMRI data collection with children aged 5-7 with hyperactivity. Supervised and operated MRI study sessions.
- Recruited subjects.

- Assisted with lab administration.
- Conducted quality control and editing of structural MRI data.
- Developed methodology for pre-processing and data analysis.

Stress and Development Laboratory, Boston Children's Hospital 2012-2013
Volunteer Research Assistant
Supervisor: Katie A. McLaughlin, Ph.D.
As a volunteer research assistant on our earlier studies on stress and development, I assisted with MRI data collection and developed data analysis scripts for fMRI behavioral data.

Teaching Experience

Psychology Department, University of Washington
TA for Psych 220: Biopsychology (two quarters) 2019
TA for PSYCH 345: Social Psychology (one quarter) 2016

Service to the Community

Gender Odyssey Kid's Camp, Seattle, WA
Volunteer 2016-2017
Area Coordinator 2015
Planned and supervised one weekend day camp for transgender and gender nonconforming children aged 5-17.

National Organization of Men Against Sexism (NOMAS), Boston, MA 2008-2012
Planning Member
Moderated multiple 4-week discussion sections for male bodied and/or male privileged adults with a focus on gender, gender equity, and violence prevention. Planned and/or participated in multiple pro-feminist events, including supply drives and public speaking events.

Safe Passage, Northampton, MA 2004
Counselor Advocate Intern
Received hotline calls from women in domestic violence situations. Provided support and service referrals.

Service to the Profession

Development and Psychopathology
International Journal of Behavioral Development
Scientific Reports
Ad-Hoc Reviewer

Clinical Experience

William S. Middleton Memorial Veteran's Hospital 2020-2021
Psychology Intern, Primary-Care Mental-Health Integration (ongoing)
A full-time, APA accredited, pre-doctoral internship working with adult veterans. I provide evidenced based treatments in the outpatient general mental health clinic and brief assessment and therapy with a population-health focus in primary-care mental-health integration. In the Spring, I will provide trauma-focused treatment to veteran's as part of the PTSD Clinical Team. Additionally, I will complete at least 6 comprehensive psychological assessments and a quality improvement project over the course of the training year.

UW Parent Child Clinic, Seattle, WA 2017-2019
Staff Therapist
Administered an evidence-based treatment for disruptive behavior disorders (behavioral parent training) to parents of school-aged children and adolescents. Attended one year of weekly group supervision, didactics, and observation.

The Stress and Development Lab, Seattle, WA 2014-present
Graduate Research Assistant
Conducted semi-structured clinical and life stress interviews with children aged 8-17, with and without histories of physical and sexual abuse, and their parents using the Kiddie Schedule for Affective Disorders and Schizophrenia (K-SADS), Clinician Administered PTSD Scale (CAPS) and other measures. Conducted safety assessments and follow-up with participants who endorsed suicidality and/or child abuse, including service referrals, safety planning, disclosure to parents, and mandated reporting to CPS. As a senior graduate student, I additionally trained and supervised research assistants and younger students conducting these tasks.

The Seattle Clinic, Seattle, WA 2017-2018
PEERS Teen Group Coach
Assisted administration of two manualized and evidence-based social skills training groups for adolescents. Provided personalized treatment and goal setting through check-ins and check-outs. Performed role-plays to model skills. Managed participant behavior in the group. Attended weekly group supervision.

Seattle Children's Hospital Neuropsychological Consult Service, Seattle, WA 2016-2017
Practicum Student
Administered neuropsychological assessments of cognitive performance (WASI, DAS-2), academic readiness (WJ-III, WIAT-III), memory (CVLT, CHAMP, WRAML), and motor skills (Beery VMI) to children in a hospital setting. With supervision, conducted intake interviews, wrote test lists and reports, and participated in feedback sessions for patients recovering from surgery and/or major medical illness.

Psychological Services and Training Center, Seattle, WA 2015-2017
Staff Therapist

Treated young adult and adolescent clients with hour for hour supervision.
Administered treatments for depression, anxiety, and adjustment disorders.

Clinical Workshops and Intensive Trainings

Treatment

Prolonged Exposure for PTSD Spring 2017
12 hours. Instructor: Laurie Zoellner, Ph.D.
Intensive training on Prolonged Exposure Treatment for PTSD.

Trauma-Focused Cognitive Behavioral Therapy Fall 2016
15 hours. Instructor: Shannon Dorsey, Ph.D.
Course covering the use of TF-CBT for the treatment of PTSD in children.

Dialectical Behavioral Therapy Skills Fall 2016
25 hours. Instructors: Melanie Harned, Ph.D., Kathryn Korslund, Ph.D.
Course covering DBT skills and pedagogical skills for teaching DBT skills groups.

Prevention of Suicide Workshop Sum. 2016
20 hours. Instructor: Marsha Linehan, Ph.D.
Workshop covering etiology of suicidal behavior and techniques for treatment, with a focus on crisis and counseling.

Cognitive and Behavioral Treatments for Depression Winter 2016
20 hours. Instructor: Corey Fagan, Ph.D.
Course covering the use of cognitive behavioral therapy, mindfulness-based cognitive behavioral therapy, and behavioral activation for the treatment of depression.

Assessment

Psychological Assessment of Children Spring 2016
40 hours, Instructor: David Breiger, Ph.D.
Course reviewing assessment in children using common neuropsychological tests of learning, achievement, and personality; core concepts in neuropsychological assessment of children; report writing; and assessment of intelligence in preschool-aged children using the DAS-2.

Assessment of Intelligence Winter 2016
30 hours, Instructor: Kevin King, Ph.D.
Course covering the nature and validity of IQ and use of the WISC-4 and WASI-2 for assessment of intelligence.

Semi-structured diagnostic assessment using the Kiddie Schedule for Affective Disorders and Schizophrenia Spring 2015
10 hours, Instructor: Ben Hankin, Ph.D.
Workshop on the use of the K-SADS for diagnostic screening with children.

Clinical Personality Assessment Sum. 2015
20 hours, Instructor: Ron Smith, Ph.D.
Course on the use of the MMPI and MMPI-2 in clinical assessment.

Other

Minority Mental Health Spring 2018
25 hours, Instructor: Jane Simoni, Ph.D.
Course reviewing common concerns in the assessment and treatment of minority populations.

Previous Work Experience

pika, MIT, Cambridge, MA 2009-2012
Residence Advisor
Lived with 25 graduate and undergraduate students in a cooperative living group. Moderated conflicts and facilitated group conversations in the community. Provided risk management and oversight. Provided emergency response, counseling, and service referrals within the house.

Planned Parenthood League of Massachusetts, Boston, MA
Managing Analyst 2012-2013
Senior Analyst 2010-2012
Applications Specialist 2009-2010
Help Desk Specialist 2007-2009
Managed 3-person team providing technical support to a large community health organization (7 offices, 250 staff). Managed large infrastructure projects including telecom and communications software upgrades and installations. Developed and implemented software solutions to reduce costs. Assisted with Electronic Medical Records implementation and support. Maintained and administered business-critical systems running on an on-site data center.
